

ARCA

ARCA is a non-profit organization dedicated to provide premier residential and vocational services to people with developmental disabilities. ARCA offers a comprehensive array of critical support services, including community and family living, supported employment, specialized services, and community inclusion for the over 500 children and adults. ARCA was founded in 1957, and has grown to be the largest non-profit service provider of its kind. ARCA relies on government funding and donor support to continue 50-year tradition of service excellence in designing and implementing innovative services for individuals with developmental disabilities.

Challenge

Because of the nature of the personalized services ARCA provides, ARCA staff members often work in diverse remote locations, which do not provide any access to the ARCA's Wide Area Network. So it was imperative, that in their search for a time and attendance solution, a key requirement was to provide an easy way for these remote employees to record their worked hours.

Solution

Employee Based Systems was the only company which, in addition to Web Time Sheet and Web based punch clock applications, also had a system called **Tele Punch**, which enabled entering time punches over any telephone handset.

Company

ARCA

Industry

Group of caring families seeking community

Challenge

Key requirement was to provide an easy way for the remote employees to record their worked hours

Products in Use

Time and Attendance:
EBSTime
EBSScheduler
EBSTimeSheet
EBSPunch
EBSTelePunch

Payroll Optimization:
EZ-Wage and Tax
EZ-GL
EZ-Time Import
EZ-401K

"The TelePunch application was a major differentiator in the selection of EBSTime as ARCA's time and attendance system. The entire implementation went very smoothly and EBS has been very responsive to all of our technical and product related questions."

-- Darrell Rasband, Payroll Manager

Efficiency

Because ARCA had so much success with the **EBSTime** module, they also decided to purchase the Scheduling module. The addition of this module enabled ARCA to create and track all the schedules for their remote corporate employees in an integrated manner with their time and attendance system.

"We now have the complete EBSTime Suite with time and attendance, TelePunch and scheduling. In addition, EBSTime provided automated **Shift Differential** and **Job Costing** capabilities, which further streamlined our work efforts."

-- Darrell Rasband, Payroll Manager

ARCA's vision is to be the role model of excellence in lifelong services for people with developmental disabilities. To accomplish this we need dedicated staff, the infrastructure and systems which enable our employees to work efficiently. **Employee Based Systems** has in fact helped ARCA greatly in this regard.
